

2K Factory Packed Sealers

4:1:1

Part Numbers for Full Gallons:

6401-1 Light Grey

6402-1 White

6403-1 Black

Mix:

4:1:1

Activate this product with 4 parts sealer to 1 part 2K primer activator #6501-4 or 6501-6 to 1 part SPI Urethane Grade Reducer.

Spraying:

Spray one wet coat of sealer over the properly prepped area and let set for 10-60 minutes before applying color. Color should be applied to sealer within 6 hours after spraying.

Precautions:

- This sealer is *not* a building primer and only one coat should be sprayed over the area to be painted. If a second coat of this sealer is used, we recommend you let the car set for 60 minutes before spraying paint over the sealer.
- Mix and stir in the activator very well to ensure uniform drying.
- Use a 1.3 or 1.4 tip for best results.
- Sealers may be tinted with each other for custom colors
