

Wax and Grease Remover – Solvent

Product Number:

710-1 (gallon)

710-1 is a solvent-based wax and grease remover that is a very high-quality product with only the best solvents used. 710-1 was not made to replace the cheap cleaners out there but to do an exceptional job which a high-quality shop needs. This is a medium-dry wax and grease remover designed to give the painter time to clean the panel without fear of the product drying too fast. Great for removing wax, grease, glues, adhesives and more.
